Evaluation Committee
Core Trust Seal Program

Re: Reactome Core Trust Seal certification application

To Whom it May Concern,

The Ontario Institute for Cancer Research (OICR) is committed to providing the research community with the tools and knowledge infrastructure needed to advance our management of cancer. As the world's foremost open database of human biological pathways and reactions, we are proud of our long support for the Reactome project and its lead PI, Dr. Lincoln Stein.

I understand that the Core Trust Seal accreditation committee has requested assurance that community access to the Reactome database will not be interrupted in the event that Reactome unexpectedly loses funding from the NIH and its other direct funders. This letter affirms OICR's institutional commitment to provide the resources required to maintain static copies of the Reactome database in internet-accessible storage repositories for an indefinite period of time, subject to OICR's continued funding from the province of Ontario.

Sincerely,

Christine Williams, PhD
Acting President and Head, Implementation Science
Ontario Institute for Cancer Research
